Module 7 aims to introduce carriers and drivers to the basics of the federal drivers’ hours of service regulations. The contents of this module are as follows.

- Federal Hours of Service Regulations
- Responsibilities of Motor Carriers
- General Exemptions
- Driver Duties
- Log Books
- Federal Driving Limitations
- Sleeper Berths
- Internal Monitoring
- Permits
- Enforcement and Penalties
- Fatigue Management
- Resources for Carriers
- Test Your Understanding: Module 7
- Answer Key
- Appendices

*This is a guide only and is not meant to be a substitute for the actual legislation.*

**Note:** A “driver” is a person who is employed or otherwise engaged by the motor carrier to operate a commercial vehicle. This means the federal drivers’ hours of service laws apply to drivers, mechanics and managers that operate regulated vehicles at any time.
FEDERAL HOURS OF SERVICE REGULATIONS

Hours of service regulations define maximum driving times and minimum off-duty times for drivers of commercial vehicles (both bus and truck) in Canada. These limits were created to prevent dangerous fatigue-related incidents from happening. Carriers must include information about drivers’ hours of service laws in their safety programs.

According to Section 2 of the Commercial Vehicle Drivers Hours of Service Regulations (SOR/2005-313), federal drivers’ hours of service regulations apply to drivers of:

- Commercial vehicles that have a gross vehicle weight of more than 4,500 kilograms and that operate in multiple provinces, territories or states.

- Commercial vehicles with a manufacturer’s seating capacity originally designed for 11 or more persons, including the driver, that operate in multiple provinces, territories or states.

If a carrier is federally regulated (i.e. they operate in multiple provinces, territories or states), their drivers must follow the federal hours of service laws. These laws will apply to the carrier’s regulated entire fleet, even if some of their drivers only operate point-to-point within Alberta.

Drivers must follow the provincial drivers’ hours of service laws if a carrier is provincially regulated. This means that they operate commercial vehicles only within Alberta. See Module 8 for more information on the provincial hours of service laws.
RESPONSIBILITIES OF MOTOR CARRIERS, SHIPPERS, CONSIGNEES AND DRIVERS

Section 4 of the Commercial Vehicle Drivers Hours of Service Regulations (SOR/2005-313) places the responsibility to help prevent fatigue-related incidents involving commercial vehicles onto:

- The motor carrier;
- The shipper;
- The consignee (receiver);
- Other persons (such as safety officers, dispatchers);
- The driver.

These responsible parties **MUST** take steps to prevent the driver from driving if:

- The driver’s faculties are impaired to the point where it is unsafe for the driver to drive;
- Driving would jeopardize or be likely to jeopardize the safety or health of the public, the driver, or the employees of the motor carrier;
- The driver is subject to an out-of-service declaration;
- The driver, in doing so, would **NOT** be in compliance with the regulations.

Anyone listed above may be subject to enforcement action if they fail to ensure compliance to the federal drivers’ hours of service regulations.

To fully understand their responsibilities, it is important that everyone understands the federal drivers’ hours of service laws. The Alberta government has prepared a guide that may assist carriers and drivers in better understanding these laws. This guide is available online at: [www.transportation.alberta.ca/675.htm](http://www.transportation.alberta.ca/675.htm).

The Canadian Council of Motor Transport Administrators (CCMTA) has also developed a Drivers Hours of Service Application Guide, which is available online at: [http://ccmta.ca](http://ccmta.ca).

Both of these documents have been used in the development of this module.
GENERAL EXEMPTIONS

The federal regulations do not apply to the following vehicles:

- A 2- or 3-axle vehicle being used for the transportation of primary products of a farm, forest, sea or lake, where the driver or the motor carrier is the producer of those primary products, OR a return trip after transporting the primary products of a farm, forest, sea or lake, if the vehicle is empty or is transporting products used in the principle operation of a farm, forest, sea or lake;
- An emergency vehicle (as defined in the regulations);
- A vehicle that is engaged in providing relief in the case of a public welfare emergency, as defined in section 5 of the Emergencies Act;
- A commercial vehicle when driven for personal use if:
  - the vehicle has been unloaded;
  - any trailers have been unhitched;
  - the distance traveled does not exceed 75 kilometres in a day;
  - the driver has recorded the odometer reading in the logbook; and
  - the driver is not subject to an out-of-service declaration.

Emergency Conditions Exemption

Federal hours of service limitations may be extended for a driver who requires more driving time in an emergency. This allows the driver to reach the first destination that provides safety for the occupants of the commercial vehicle and for other users of the road or the security of the commercial vehicle and its load. The driver must stop at the first place of safety. A driver who uses this exemption must write that they have done so in the “remarks” section of their daily log.
Adverse Driving Conditions

A driver who encounters adverse driving conditions may extend the permitted 13 hours of driving time and reduce the 2 hours of daily off-duty time by the amount of time needed to complete the trip if:

- The driving, on-duty and elapsed time in the elected cycle are not extended more than 2 hours;
- The driver still takes the required 8 consecutive hours of off-duty time;
- The trip could have been completed under normal driving conditions without the reduction;
- The adverse driving conditions were not known or could not have been reasonably known by a driver or carrier before the driver began driving.

Adverse driving conditions are defined as snow, sleet, fog, or other adverse weather or road conditions.
DRIVER DUTIES

The duties performed by a driver can be classified into four categories or “Duty Statuses.” These duty statuses are:

- **Off-Duty Time** (other than time spent in a sleeper berth)
- **Sleeper Berth Time** (off-duty time spent in a sleeper berth)
- **Driving Time**
- **On-Duty Time** (other than driving time)

In the federal drivers’ hours of service regulations, “on-duty time” means the period that begins when a driver begins work or is required by the motor carrier to be available to work. This period ends when the driver stops working. On-duty time includes driving time and time spent by the driver:

a) Inspecting, servicing, repairing, conditioning or starting a commercial vehicle;
b) Travelling in a commercial vehicle as a co-driver, when the time is not spent in the sleeper berth;
c) Participating in the loading or unloading of a commercial vehicle;
d) Inspecting or checking the load of a commercial vehicle;
e) Waiting for a commercial vehicle to be serviced, loaded, unloaded or dispatched;
f) Waiting for a commercial vehicle or its load to be inspected;
g) Waiting at an en-route point because of a collision or other unplanned occurrence or situation;
h) Resting in or occupying a commercial vehicle for any other purpose except:
   a. Time spent travelling as an off-duty passenger;
   b. Time spent in a sleeper berth;
   c. Time spent in a stationary commercial vehicle to satisfy off-duty time requirements
i) Performing any work for any motor carrier.

“Off-duty time” means any period other than on-duty time and includes “sleeper berth time.” The requirements of these duty statuses as well as the “driving time” limitations will be described in more detail later in this module.
LOG BOOKS

Carriers must ensure their drivers maintain accurate records of their duty status times for each calendar day. These times must be recorded in a log book or on a radius record (when all criteria are met for the 160 kilometer radius record exemption).

These records must be kept so that a carrier may ensure a driver does not exceed the specified hour limitations. Carriers and drivers can obtain blank daily log books from truck stops, stationary stores or printing companies.

According to Section 82 of the *Commercial Vehicle Drivers Hours of Service Regulations* (SOR/2005-313), each daily log is required to contain the following information:

**At the start of a day, a driver must record:**
- Date
- Start time of driver’s day (if other than midnight - using the local time at the driver’s home terminal)
- The name and address of the driver’s home terminal
- Name of the driver (and co-driver if applicable)
- The cycle the driver is following
- The vehicle’s unit or licence plate number
- The odometer reading of the vehicle
- In the “Remarks” section, the driver must indicate whether the deferral exemption was used, and whether the driver is on Day 1 or 2 if it was used

**During the day, a driver must record:**
- In the “Remarks” section, the driver must indicate:
  - The name of the location where each change of duty occurred;
  - Whether the driver used any exemptions that allowed them to exceed the maximum driving limitations (emergency or adverse driving conditions)

**At the end of a day, a driver must record:**
- The driver’s signature (and co-driver if applicable)
- The total distance driven that day
- The total hours for each duty status that day
- The odometer reading of the vehicle
Log book data must be completed on a graph grid so that each piece of required information may be recorded accurately. The grid is filled out in a way that ensures all of the driver’s hours are accounted for in each of the four duty statuses.

**SCHEDULE 2 (Section 1 and subsection 82(2))**

**DUTY STATUS**

<table>
<thead>
<tr>
<th>NAME / NOM</th>
<th>DATE</th>

Remarks / Observations

Total distance driven / Distance totale parcourue

Signature
INSTRUCTIONS FOR FILLING IN A LOG GRID

(a) For each duty status,
   i. Mark the beginning time and the end time, and
   ii. Draw a continuous line between the time markers;

(b) Record the name of the municipality or give the location on a highway or in a legal sub-division and the name of the province or state where a change in duty status occurs;

(c) If the driver is engaged in making deliveries in a municipality that result in a number of periods of driving time being interrupted by a number of short periods of other on-duty time, the periods of driving time may be combined and the periods of other on-duty time may be combined; and

(d) Enter on the right of the grid the total number of hours of each period of duty status, which total must equal 24 hours.

Note: When recording the location where a change in duty status occurs, drivers must write out the full name of that location. Only province or state names may be abbreviated.

Onboard Recording Devices

A driver is permitted to use an electronic onboard recording device instead of filling out a log book. The device must still provide all of the required information found in Section 82 of the Commercial Vehicle Drivers Hours of Service Regulations (SOR/2005-313).

An onboard recording device must also be capable of displaying:

- The driving times and other on-duty times for each day when the device is used;
- The total on-duty time remaining and the total on-duty time accumulated in the cycle being followed by the driver;
- The changes in duty status and the time at which each change occurred for each day on which the device is used;
- The times and dates on which the device has been disconnected and reconnected.

At the request of a peace officer, a driver must be able to immediately provide the required information for the previous 14 days by producing it on the screen of the electronic onboard recording device, in handwritten form, on a print-out or any combination of these.

This means that drivers must have blank daily log forms in the commercial vehicle. Any printed copy of the daily log that is generated from the information stored in the device must be signed on each page by the driver to confirm its accuracy.
Drivers must prepare a daily log for each day that they are employed by a motor carrier, including days which are spent off-duty (such as weekends). Drivers who have been off-duty for several days may record their daily log information for multiple consecutive off-duty days on a single log book page as long as:

- The log page is fully completed with all required information;
- The information on the log is readable and accurate;
- The days referenced as off-duty are consecutive dates;
- The log page does not include information for a day that shows any duty status other than “off duty time other than time spent in a sleeper berth”.

The following is an example of how a driver would fill out a log for multiple off-duty days:

<table>
<thead>
<tr>
<th>HOUR AT WHICH DAY BEGAN (Midnight)</th>
<th>Use Time Standard at Home Terminal</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
</tr>

---

Possession of Daily Logs and Supporting Documents

Commercial Vehicle Safety Compliance in Alberta

Last Updated: April 2014
A driver is required to submit each completed log to the carrier within 20 days of being produced. The carrier must, within 30 days of receiving the original copy of a daily log, retain that copy of the log at their principal place of business. All original log book records must be kept by the carrier for at least 6 months from the date the information was recorded.

When requested by a peace officer, a driver must produce their logs and supporting documentation without delay. Supporting documentation may include things such as:

- Trip inspection reports;
- Bills of lading;
- Other shipping documents;
- Fuel receipts;
- Lodging receipts;
- Other expenses.

All relevant expense receipts should be kept, regardless of whether the driver or carrier paid for such things as meals and lodging.

A driver may be exempt from filling out daily logs if they are eligible for the 160 kilometer radius exemption. This exemption applies ONLY to record keeping requirements. ALL other requirements of the regulations must still be met.

To qualify for this exemption, a carrier must meet the following requirements:

- The driver operates within a 160 kilometer radius of their home terminal;
- The driver returns to their home terminal each day to begin a minimum of 8 consecutive hours of off-duty time;
- The motor carrier that employs the driver maintains accurate and legible time records showing, for each calendar day, the driver’s duty status and elected cycle, the hour at which each duty status begins and ends and the total number of hours spent in each status;
- The motor carrier keeps these driver records for a period of at least 6 months.
“Home terminal” means the place of business of a motor carrier where a driver usually reports for work. This includes a temporary work site designated by the motor carrier.

For example, if a driver normally reports to a terminal in Edmonton, then that is their home terminal. If that same driver makes a trip out to Saskatoon and reports to a terminal there for several days or weeks, then that may temporarily be their home terminal until they return to Edmonton. They would, however, be required to fill out a daily log for each trip between Edmonton and Saskatoon.

When a driver is not required to keep a daily log, they must (as noted above) still maintain time records showing, for each calendar day, the driver’s duty status and elected cycle, the hour at which each duty status begins and ends and the total number of hours spent in each status. A sample of what a 160 kilometer radius record may look like is on the next page.

**Total Hours** | 13.5 | 6.0 | 4.5 | 24 Total

**Note:** Other formats for a radius record can be used provided they contain at least the minimum required information. More samples are available in Appendix 1 of this module and on pages 44-47 of the CCMTA Hours of Service Application Guide.
It is against the law to tamper with a daily log. Tampering with the daily log includes any of the following activities:

- Driver keeps more than one daily log for any day;
- Driver records inaccurate information in a daily log, whether it is handwritten or produced using an electronic device;
- Anyone falsifies, mutilates or defaces a daily log or supporting documents;
- Safety officer or any other individual alters or tampers with original daily logs.

According to Section 86(2) of the Commercial Vehicle Drivers Hours of Service Regulations (SOR/2005-313), a carrier is responsible for ensuring their drivers do not falsify their logs. More information about how to monitor drivers’ logs is available later in this module.

Daily logs must be signed at the end of each day to confirm that all of the information recorded in a daily log is accurate. If a log contains false information, a peace officer can still charge a driver with a violation even if the driver has not signed the daily log. They may also issue an out-of-service declaration for any of the violations listed above.
FEDERAL DRIVING LIMITATIONS

There are 3 types of limitations that apply to a driver’s time; daily limits, work shift limits and cycle limits. It is a driver’s responsibility to comply with all 3 limitations at all times. It is important that all carriers are aware of these limitations. Fatigued drivers pose a great risk to themselves and all motorists around them and must not operate a commercial vehicle in such a state.

1. Daily Limits

A “day” is a 24-hour period that begins at the hour designated by the carrier for the duration of the driver’s cycle. For example, one driver’s day might start at midnight while another driver’s day might start at 2:00am. The driver needs to record the hour at which the day begins on their log book page (for example, midnight or 2:00 am).

According to the Commercial Vehicle Drivers Hours of Service Regulations (SOR/2005-313), rules which apply to a driver’s day include:

According to Section 12, a driver may not drive a commercial vehicle after they have already driven 13 hours in a day.
According to Section 12, a driver must not drive a commercial vehicle if they have accumulated 14 hours of on-duty time in a day.

According to Section 14, a driver must take at least 10 hours of off-duty time in a day. This time must include at least 2 hours of off-duty time other than the mandatory 8 consecutive hours of off-duty time. These 2 hours of off-duty time must be taken in blocks greater than or equal to 30 minutes and may be taken in consecutive blocks before or after the 8 mandatory hours of off-duty time.

Any person who is authorized by the carrier to be a driver is considered to be a driver every day. This means they must have at least 10 hours off-duty every 24 hour day, whether they drive or not. Every driver must fill out a daily log for every day they are employed as an authorized driver, even if that log only displays off-duty time.
Deferral of Off-Duty Time

According to Section 16, if a driver is unable to take 10 hours off-duty in a day, the driver can defer up to 2 hours off-duty to the following day. This deferral option can be used every second day as long as all the conditions are met.

To defer daily off-duty time, a driver must meet the following conditions:

- The off-duty time deferred is not part of the mandatory 8 consecutive hours of off-duty time.
- The off-duty time deferred is added to the 8 consecutive hours of off-duty time taken in the second day.
- The total off-duty time taken in the 2 days is at least 20 hours.
- The total driving time in the 2 days does not exceed 26 hours.
- The driver declares that they are deferring off-duty time under the "Remarks" section of their logs and clearly indicates whether they are driving under day one or day two of that time.

[Diagram showing off-duty and driving times for two days with deferral of off-duty time highlighted.]
A work shift is the period of time that a driver is “on the job”. The work shift begins when a driver performs any activity for a motor carrier and ends when the driver stops for a period of rest which lasts for 8 consecutive hours. A work shift can span across more than one calendar day.

According to the Commercial Vehicle Drivers Hours of Service Regulations (SOR/2005-313), rules which apply to a driver’s work shift include:

**2. Work Shift Limits**

- According to Section 12, a driver may not drive a commercial vehicle after they have already driven 13 hours in a work shift. They may drive again after they have taken 8 consecutive hours of off-duty time.

- According to Section 12, a driver may not drive a commercial vehicle after they have accumulated 14 hours of on-duty time in a work shift.

<td>1</td>
</tr>
</tbody>
</table>

---

**The 13-Hour Driving Time in a Work Shift Rule**

According to Section 12, a driver may not drive a commercial vehicle after they have already driven 13 hours in a work shift. They may drive again after they have taken 8 consecutive hours of off-duty time.

**The 14-Hour On-Duty in a Work Shift Rule**

According to Section 12, a driver may not drive a commercial vehicle after they have accumulated 14 hours of on-duty time in a work shift.
A driver may not drive a commercial vehicle after 16 hours of time have elapsed since the driver started a work shift. The clock starts ticking at the end of the most recent period of 8 or more consecutive hours of off-duty time.
A driver must have 8 consecutive hours of off-duty time between work shifts.

The 8 consecutive hours off-duty required to restart a work shift may be a combination of off-duty and sleeper berth time. A driver may also take the 8 consecutive hours rest in the sleeper berth.

A driver is only in violation of the above work shift rules if the driver is driving after reaching the limits. In certain cases, the driver may work after 13 hours driving, 14 hours on-duty or 16 hours of elapsed time.

According to Section 27 of the Commercial Vehicle Drivers Hours of Service Regulations (SOR/2005-313), there are two types of driving cycles:

**Cycle 1**
- No driving after 70 hours on-duty in any 7 days

**Cycle 2**
- No driving after 120 hours on-duty in any 14 days
- Driver must take at least 24 consecutive hours of off-duty time before accumulating more than 70 hours of on-duty time during this cycle.
According to Section 24, a carrier must ensure that a driver follows either Cycle 1 or Cycle 2. A driver is required to declare which cycle they are following on their daily logs.

If a driver reaches their declared cycle limit, the driver must **stop driving**. The driver then has the choice to either:

- Take the necessary number of hours off-duty to bring them back into compliance with the cycle limits (the cycle period continually slides by adding the current day and subtracting the oldest day of the cycle);
- Reset their cumulative on-duty hours back to “zero” by taking the number of hours off-duty as specified by the cycle they were following.

Occasionally, carriers and drivers may find that they benefit from using a different cycle. According to Section 29, if a driver wants to switch cycles, they must take the following number of hours off-duty:

- Driver must take at least 36 consecutive hours off.
- Driver must take at least 72 consecutive hours off.

A driver is only in violation when **driving** in excess of the cycle cumulative hours specified by law. In Canada, drivers may reset their cycle at any time before they reach their cycle limit.

**NOTE**

When operating in other jurisdictions (such as in the United States), a driver must recognize and follow the hours of service laws of that jurisdiction. When a driver returns to and drives in Canada, the driver must follow Canada’s hours of service laws.
According to Section 25, a driver may not drive unless they have taken at least 24 consecutive hours of off-duty time in the preceding 14 days. This rule applies regardless of whether a driver follows Cycle 1 or 2.

A driver is only in violation of the mandatory 24 hours off duty if the driver is driving after reaching the 14 day limit. The driver may continue to work without having a 24 hour period of off-duty time in the preceding 14 days as long as that work does not involve driving an NSC regulated vehicle.

In the following example, the driver is on-duty for 14 days (to third Sunday) but does not reach either the Cycle 1 or Cycle 2 limit. The driver must take 24 consecutive hours of off-duty time before the driver may drive again.
Off-duty drivers must continue to maintain a daily log or a radius record long as they are employed as a driver for a carrier. As noted earlier in this module, if a driver has been off-duty for several days, they may record their daily log information for multiple off-duty days on a single log book page provided that:

- The log page is fully completed with all of the required information in Section 82 of the Commercial Vehicle Drivers Hours of Service Regulations (SOR/2005-313);
- The information on the log is legible and accurate;
- The days referenced as off duty are consecutive;
- The log page does not include information for a day that shows any duty status other than “off duty time other than time spent in a sleeper berth” (i.e. the days off can’t be shown in the remarks section of a log completed on the first day the driver is back on duty).
If a commercial vehicle has an approved sleeper berth, a driver can stop and rest whenever they are tired or during any extended period of waiting. An approved sleeper berth is one that meets all of the requirements found in Schedule 1 of the Commercial Vehicle Drivers Hours of Service Regulations (SOR/2005-313). The requirements for sleeper berths have been included in Appendix 2 of this module.

A driver records any time spent resting in a sleeper berth as “Off-Duty Time in a Sleeper Berth” on their daily log. A driver can use a sleeper berth to split the required 8 consecutive off-duty hours into 2 periods while still complying with the daily off-duty requirements.

According to Section 18 of the federal regulations, a driver can split the required 10 hours of daily off-duty time into 2 sleeper berth periods if:

- Neither period is less than 2 hours;
- The total of the 2 sleeper periods is at least 10 hours;
- The off-duty time is spent resting in the sleeper berth;
- The total off-duty time in the day is at least 10 hours;
- The total of the driving time in the periods immediately before and after each of the periods of off-duty time does not exceed 13 hours;
- The elapsed time before and after each sleeper period does not include any driving time after the 16th hour after the driver comes on-duty;
- None of the daily off-duty time is deferred to the next day.
Example of an Acceptable Use of a Sleeper Berth:

**Day One:**

<table>
<thead>
<tr>
<th>HOUR AT WHICH DAY BEGINS (Midnight)</th>
<th>Use Time Standard at Home Terminal</th>
</tr>
</thead>
<tbody>
<tr>
<td>Off-duty time other than in sleeper berth</td>
<td>8 hours</td>
</tr>
<tr>
<td>Off-duty time in sleeper berth</td>
<td>3 hours</td>
</tr>
<tr>
<td>Driving time</td>
<td>6 hours</td>
</tr>
<tr>
<td>On-duty time other than driving time</td>
<td>2</td>
</tr>
</tbody>
</table>

**Day Two:**

<table>
<thead>
<tr>
<th>HOUR AT WHICH DAY BEGINS (Midnight)</th>
<th>Use Time Standard at Home Terminal</th>
</tr>
</thead>
<tbody>
<tr>
<td>Off-duty time other than in sleeper berth</td>
<td>7 hours</td>
</tr>
<tr>
<td>Off-duty time in sleeper berth</td>
<td>3 hours</td>
</tr>
<tr>
<td>Driving time</td>
<td>7 hours</td>
</tr>
<tr>
<td>On-duty time other than driving time</td>
<td>6</td>
</tr>
</tbody>
</table>

- Stop driving after 13 hours driving time in a day;
- Stop driving after 14 hours on-duty time in a day;
- At least 10 hours off-duty in a day and none of the off-duty time is deferred to the next day;
- Stop driving after 13 hours driving time before and after each eligible sleeper berth period;
- Stop driving after 14 hours on-duty time before and after each eligible sleeper berth period;
- Stop driving after 16 hours of elapsed time in a work shift.

**Note:** When calculating the 16th hour of elapsed time in a split sleeper, any period in the sleeper berth that is greater than 2 hours and adds to 10 with any subsequent period is not calculated in the elapsed time.
According to Section 19 of the federal regulations, team drivers can split the required 10 hours of daily off-duty time into 2 sleeper berth periods if:

- Neither period is less than 4 hours;
- The total of the 2 sleeper periods is at least 8 hours;
- The off-duty time is spent resting in the sleeper berth;
- The total driving time before and after each sleeper period does not exceed 13 hours;
- The total of the on-duty time before and after each sleeper period does not include any driving time after the 14th hour;
- The elapsed time before and after each sleeper period does not include any driving time after the 16th hour after the driver comes on-duty;
- None of the daily off-duty time is deferred to the next day.
- Co-drivers have the freedom to split the 10 hours of daily off-duty time in any way that the drivers want as long as each sleeper berth period is at least 4 hours and the total for 2 sleeper berth periods equals at least 8 hours.

Team drivers must maintain their own daily logs and must meet the daily and work shift limits on their own. When one driver is driving, the other must be resting in the sleeper berth.

Only time spent in the sleeper berth counts towards the sleeper berth period. This means that any other off-duty time, such as sitting in the passenger seat, does not count towards the sleeper berth period.

**Note**
Because the eligible sleeper berth periods for team drivers only require a total of 8 hours of sleeper berth time, each team driver must take an extra 2 hours of off-duty time each day to meet the daily 10-hour requirement. This time may or may not be taken consecutively with the sleeper berth time.
Example of an Acceptable Use of a Sleeper Berth:

Day One:

- Off-duty time other than in sleeper berth: 8 hours
- Sleeper time: 4 hours
- Total: 9 hours

Day Two:

- Off-duty time other than in sleeper berth: 1 hour
- Sleeper time: 4 hours
- Total: 2 hours

- Off-duty time other than in sleeper berth: 1 hour
- Sleeper time: 4 hours
- Total: 10 hours

- Off-duty time other than in sleeper berth: 2 hours
- Sleeper time: 4 hours
- Total: 11 hours

✓ Stop driving after 13 hours driving time in a day;
✓ Stop driving after 14 hours on-duty time in a day;
✓ At least 10 hours off-duty in a day and none of the off-duty time is deferred to the next day;
✓ Each sleeper berth period is at least 4 hours;
✓ The total for 2 sleeper periods is at least 8 hours;
✓ Stop driving after 13 hours driving time before and after each eligible sleeper berth period;
✓ Stop driving after 14 hours on-duty time before and after each eligible sleeper berth period;
✓ Stop driving after 16 hours of elapsed time in a work shift.
INTERNAL MONITORING

According to Section 87 of the Commercial Vehicle Drivers Hours of Service Regulations (SOR/2005-313), carriers must ensure their drivers are following hours of service laws. They must:

- Evaluate all drivers to ensure they are complying with the regulations;
- Record the date(s) in which any violation(s) occurred;
- Record the date of issuance to the driver of a notice of non-compliance;
- Record any actions taken with the driver.

Monitoring activities involve the review of driver logbooks, supporting documents (such as fuel and lodging receipts) and any other relevant information. Carriers must document their findings to support any corrective or disciplinary action taken against a non-compliant driver.

It is recommended that carriers check their driver’s logs as frequently as possible. Carriers should consider reviewing their driver’s logs on a monthly basis.

The number of drivers and logs checked by a carrier every month may vary according to the size of the company. A small company may choose to monitor all drivers’ logs every month, while a large company may choose only to monitor a portion of their drivers each month. Although a carrier has the option to monitor a percentage of their drivers each month, every driver should be checked at least once each year.

The objective of internal monitoring is to ensure all drivers become fully compliant every day – not just to document each driver’s performance. It is recommended that carriers closely monitor new drivers or drivers with a history of non-compliance until they can demonstrate that they understand and are able to comply with the Commercial Vehicle Drivers Hours of Service Regulations.

More information about how to monitor logs is available online at www.transportation.alberta.ca/675.htm
PERMITS

Some carriers need drivers to work for longer periods of time than the federal hours of service limits allow. For example, a carrier may need to reduce off-duty time or increase driving time to do the following:

- Allow a driver following a regular itinerary to reach the driver’s destination or home terminal;
- Deliver perishable goods;
- Accommodate a significant temporary increase in the transportation of passengers or goods by the motor carrier.

In these situations, a carrier may apply for a permit to increase the driving time and/or on-duty time available to a driver.

It is also recognized that oil well service vehicles work in a challenging environment. Drivers may need to work for longer periods than the existing cycles allow.

Applicants are not guaranteed to obtain any permit. A carrier’s eligibility to obtain a permit may depend on things such as the carrier’s Safety Fitness Rating and any results that may come of an audit or a permit inspection.

Once a carrier has been issued a permit, they will be required to follow all of the conditions attached to that permit. It is of utmost importance that a carrier follows all conditions to ensure that they do not pose a risk to the public or to their employees while they operate.

More information on permits is available in Module 4 of this manual or on the Alberta Transportation website at: www.transportation.alberta.ca/4489.htm
ENFORCEMENT AND PENALTIES

Disciplinary Action and Enforcement

Carriers will be subject to disciplinary action if they allow a driver to drive in the following situations:

- The driver’s faculties are impaired to the point where it is unsafe for the driver to drive;
- Driving would jeopardize the safety or health of the public, the driver or the employees of the motor carrier;
- The driver is subject to an Out-of-Service declaration; or
- The driver, in doing so, would not be in compliance with these regulations.

Hours of service violations are included in the carrier’s Profile. An accumulation of these violations may result in the carrier being identified for further monitoring and further enforcement actions.

Hours of service violations will also be shown on the driver’s commercial driver abstract (CDA). More information on the CDA can be found on the Alberta Transportation website at: www.transportation.alberta.ca/4664.htm

Out of Service Declarations

A peace officer can issue tickets to drivers on the road who cannot produce hours of service records. They may also place drivers Out of Service for up to 72 hours. Drivers who have exceeded the hours of service limitations may be forbidden from driving by a peace officer until they have enough hours available to start driving again. A driver may also be subject to administrative penalties for not following hours of service laws.

A carrier may lose hours of service permit privileges if they are found to be non-compliant with the regulations or the permit conditions.
FATIGUE MANAGEMENT

Driver fatigue is a critical safety issue that affects the transportation industry and increases the risk of collisions, which in turn impacts the safety of the motoring public. Fatigue impacts driver attention and alertness and, as a result, increases instances of human error. It is estimated that 20 percent of fatal collisions can be linked to driver fatigue as a contributing factor (Canadian Council of Motor Transport Administrators, 2010).

It is recommended that all carriers create a fatigue management program. This program can be used to address issues related to fatigue in the workplace while reducing risks related to fatigue and decreasing the number of fatigue-related incidents. Every carrier can benefit from having a fatigue management program, regardless of the size or type of business. Fatigue management policies should be a part of a company’s journey management. Planning the journey ensures that employees are better prepared to safely handle unplanned events or circumstances during trips. With journey management processes in place, potential risks can be better identified prior to the trip, and proactive measures can be taken to help manage or prevent the risks from happening during the trip.

The North American Fatigue Management Program (NAFMP) was created to reduce incidents related to driver fatigue by providing:

- Information on how to develop a corporate culture that helps reduce driver fatigue;
- Fatigue management education for drivers, drivers’ families, carrier executives and managers, shippers/receivers, and dispatchers;
- Information on sleep disorders, screening and treatment;
- Driver and trip scheduling information;
- Information on Fatigue Management Technologies.

Carriers are encouraged to take part in this program. Carriers, owner/operators, managers, drivers and dispatchers may all find material presented by the NAFMP to be very helpful and may more effectively contribute to the prevention of motor vehicle incidents caused by fatigue as a result of their understanding.

More information on this program is available online at: www.nafmp.org
RESOURCES FOR CARRIERS

For a better understanding as to how federal hours of service regulations affect their operations, carriers may wish to refer to these online resources for more information.

1. The federal hours of service regulations apply to carriers who operate commercial vehicles having registered Gross Vehicle Weight of more than ________ kilograms and buses that are originally designed to transport ________ or more persons, including the driver.
   a. 11,794 kilograms / 11 or more persons
   b. 11,794 kilograms / 5 or more persons
   c. 4,500 kilograms / 11 or more persons
   d. 4,500 kilograms / 5 or more persons

2. Under the federal regulations, a driver may not drive a commercial vehicle for more than ________ hours of driving time in a day.
   a. 12 hours
   b. 13 hours
   c. 14 hours
   d. 15 hours

3. Under the federal regulations, a driver may not drive a commercial vehicle after they have accumulated ________ hours of on-duty time in a day.
   a. 12 hours
   b. 13 hours
   c. 14 hours
   d. 15 hours

4. A driver must be off-duty for at least ________ hours in a day.
   a. 7 hours
   b. 8 hours
   c. 9 hours
   d. 10 hours

5. A driver must take ________ consecutive hours off-duty before starting a new work shift.
   a. 7 hours
   b. 8 hours
   c. 9 hours
   d. 10 hours
6. Which of the following daily limits did this driver (above) violate?

a. No driving after 13 hours driving in a day
b. No driving after 14 hours on-duty in a day
c. Take at least 10 hours off-duty before driving again
d. Both B and C

Note: Off-duty time from 0:00 – 2:00 and 18:00 – 24:00 make up part of the above driver’s 8 consecutive hours off-duty time

7. Which of the following limits did this driver (above) violate?

a. No driving after 13 hours driving in a work shift
b. No driving after 14 hours on-duty in a day
c. No driving after 16 hours elapsed time
d. This driver did not commit any violations
8. A driver must not drive after they have accumulated 14 hours of on-duty time during a work shift.

   a. True
   b. False

9. Which of the following violations did this driver (above) commit?

   a. No driving after 13 hours driving in a day
   b. No driving after 14 hours on-duty in a day
   c. Take at least 10 hours off-duty before driving again
   d. This driver did not commit any violations
10. A driver may drive a maximum of 70 hours over a period of 7 consecutive days if they are following:

   a. Cycle 1
   b. Cycle 2
   c. No cycle
   d. Either cycle

11. Regardless of the cycle a driver is operating under, a driver may not drive unless they have taken at least _________ hours of off-duty time in the last _________ days.

   a. 48 consecutive hours / 14 days
   b. 24 consecutive hours / 14 days
   c. 48 consecutive hours / 7 days
   d. 24 consecutive hours / 7 days

12. According to the federal regulations, a driver can split the required 10 hours of daily off-duty time into 2 sleeper berth periods.

   a. True
   b. False
ANSWER KEY: MODULE 7

1. C. 4,500 kilograms / 11 or more persons
2. B. Under the federal regulations, a driver may not drive a commercial vehicle for more than 13 hours of driving time in a day.
3. C. Under the federal regulations, a driver may not drive a commercial vehicle after they have accumulated 14 hours of on-duty time in a day.
4. D. A driver must be off-duty for at least 10 hours in a day.
5. B. A driver must take 8 consecutive hours off-duty before starting a new work shift.
6. D. Both B and C.
   
   **Violations:**
   - **b. No driving after 14 hours on duty:**
     - Driver drove after 14 hours on-duty (the 14th hour was reached at 22:30)
     - Driver drove in violation from 22:30 – 23:30 for a total of 1 hour in violation
   - **c. Take at least 10 hours off-duty before driver can drive again:**
     - Driver did not take 10 hours off-duty (only took 9)
     - Driver did not take 2 hours that weren’t part of the 8 consecutive hours of off-duty time (only took 1 hour)
7. D. his driver did not commit any violations.
8. A. True. A driver must not drive after they have accumulated 14 hours of on-duty time during a work shift.
9. A. No driving after 13 hours driving in a day.
   
   **Violations:**
   - **Day One:**
     - Driver drove after 13 hours driving time (the 13th hour was reached at 23:00)
     - Driver drove in violation from 23:00 – 24:00 for a total of 1 hour in violation
   - **Day Two:**
     - Driver drove after 13 hours driving time (the 13th hour was reached at 23:00)
     - Driver drove in violation from 23:00 – 24:00 for a total of 1 hour in violation
10. A. Cycle 1: A driver must not drive after 70 hours on-duty in any 7 days.
11. B. A driver may not drive unless they have taken at least 24 consecutive hours of off-duty time in the last 14 days.
12. A. True. A driver can split the required 10 hours of daily off-duty time into two sleeper berth periods if they meet all of the proper requirements found in Section 18 of the federal regulations.

APPENDIX 2: SLEEPER BERTH SPECIFICATIONS

SLEEPER BERTHS

1. An area of a commercial vehicle is a sleeper berth if
   (a) It is designed to be used as sleeping accommodation;
   (b) It is located in the cab of the commercial vehicle or
       immediately adjacent to the cab and is securely fixed
       to it;
   (c) It is not located in or on a semi-trailer or a full trailer;
   (d) If it is located in the cargo space, it is securely
       compartmentalized from the remained of the cargo
       space;
   (e) In the case of a bus,
       i. it is located in the passenger compartment,
       ii. it is at least 1.9 m in length, 60 cm in width and
           60 cm in height,
       iii. it is separated from the passenger area by a solid
           physical barrier that is equipped with a door that
           can be locked,
       iv. it provides privacy for the occupant, and
       v. it is equipped with a means to significantly limit
           the amount of light entering the area;
   (f) in the case of a commercial vehicle other than a bus,
       it is rectangular in shape with at least the following
       dimensions:
       i. 1.9 m in length, measured on the centre line of the
          longitudinal axis,
       ii. 60 cm in width, measured on the centre line of the
          transverse axis,
       iii. 60 cm in height, measured from the sleeping
           mattress to the highest point of the area;
   (g) It is constructed so that there are no impediments to
       ready entrance to or exit from the area;
   (h) There is a direct and readily accessible means of
       passing form it into the driver’s seat or compartment;
   (i) It is protected against leaks and overheating from the
       vehicle’s exhaust system;
   (j) It is equipped to provide adequate heating, cooling
       and ventilation;
   (k) It is reasonably sealed against dust and rain;
   (l) It is equipped with a mattress that is at least 10 cm
       thick and adequate sheets and blankets so that the
       occupant can get restful sleep; and
   (m) It is equipped with a means of preventing ejection of
       the occupant during deceleration of the commercial
       vehicle, the means being designed, installed and
       maintained to withstand a total force of 2,700 kg
       applied toward the front of the vehicle and parallel to
       the longitudinal axis of the vehicle.
